Nishad Raval

Python Developer Intern Aspirant

nishadsraval@gmail.com | +91 9274462128 | GitHub | Portfolio | LinkedIn

Profile

B.Sc. Information Technology student focused on Python programming and practical software development. Building foundational skills in Python, SQL, data handling, and data analytics, with an interest in automation and machine learning. Seeking an entry-level Python internship to strengthen programming fundamentals and contribute to real-world projects.

Technical Skills

Programming: Python, SQL
Data Analytics: Pandas, Statistics, Data Handling
Tools: Git, GitHub, VS Code, Microsoft Excel
Python Technologies: CustomTkinter, SQLite

Projects

LADO – Local Autonomous Digital Operator Python Project
Python, CustomTkinter, SQLite

- Designed a Python desktop application to help organize files on a computer.
- Planned features for automatically sorting files into folders.
- Worked with CustomTkinter for the interface and SQLite for local data storage.
- Explored ways to package the application for desktop use.

Loan Approval Analytics Dashboard Data Analytics Project
Microsoft Power BI, Data Analysis, Data Visualization

- Analyzed 614 loan application records to explore approval trends and applicant characteristics.
- Created KPI cards and visualizations covering loan status, credit history, income, loan amounts, and demographics.
- Added interactive slicers for gender, education, and property area to enable filtered data exploration.
- Presented loan application patterns through a consolidated, interactive Power BI dashboard.

Education

P. P. Savani University 2024 – 2028 (Expected)
Bachelor of Science (B.Sc.) in Information Technology
CGPA: 6.69/10

Training & Certification

Deloitte – Data Analytics Job Simulation October 2025
Completed a practical data analytics job simulation through Forage involving data analysis and forensic technology tasks.
